

3. STATEMENT — ASSUMPTIONS

An **assumption** is something taken for granted i.e., a fact that can be supposed on considering the contents of the given statement.

TYPE 1

In this type of questions, a statement is given, followed by two assumptions. The candidate is required to assess the given statement and then decide which of the given assumptions is implicit in the statement and choose the same from the alternatives provided.

ILLUSTRATIVE EXAMPLES | .

Directions : *In each question below is given a statement followed by two assumptions numbered I and II. Consider the statement and decide which of the given assumptions is implicit.*

Give answer (a) if only assumption I is implicit; (b) if only assumption II is implicit; (c) if either I or II is implicit; (d) if neither I nor II is implicit and (e) if both I and II are implicit.

Ex. 1. Statement : It is desirable to put the child in school at the age of 5 or so.

Assumptions : I. At that age the child reaches appropriate level of development and is ready to learn.

II. The schools do not admit children after six years of age.

(Bank P.O. 1W7)

Sol. Since the statement talks of putting the child in school at the age of 5, it means that the child is mentally prepared for the same at this age. So, I is implicit. But, nothing about admission after six years of age is mentioned in the statement. So, II is not implicit.

Hence, the answer is (a).

Ex. 2. Statement : "You must learn to refer to dictionary if you want to become a good writer." — A advises B.

Assumptions : I. Only writers refer to the dictionary.

II. All writers good or bad refer to the dictionary.

Sol. It does not follow from the statement that only writers and nobody else refers to the dictionary. Also, nothing is mentioned about bad writers. So, both the assumptions I and II are not implicit.

Sol. Clearly, nothing about the response of society members to the society's request can be deduced from the statement. So, I is not implicit. Also, the society requests the members to save the money on tax. So, II is implicit.

Hence, the answer is (6).

Ex. 4. Statement : "If you want to give any advertisement, give it in the newspaper X." — A tells B.

Assumptions : I. B wants to publicise his products.

II. Newspaper X has a wide circulation.

Sol. The word 'If' in the statement shows that B may or may not want to publicise his products. So, I is not implicit. It is advised that advertisements be given in newspaper X. This means that X will help advertise better i.e., it has wider circulation. So, II is implicit.

Hence, the answer is (6).

Ex. 5. Statement : We must settle all the payment due to our suppliers within three working days. (**&B.L.P.O. 1997**)

Assumptions : I. We will always have necessary funds in our account to settle the bills.

II. We are capable of verifying and clearing the bills in less than three working days.

Sol. Since the statement talks of making all payments within three days, it is evident that the company has the necessary funds and the bills can be verified and cleared within the stipulated time. So, both I and II are implicit.

Hence, the answer is (e).

Ex. 6. Statement : A good book, even if costly, is sold.

Assumptions : I. Some books are better than others.

II. Most of the books are costly.

Sol. The statement mentions about a 'good' book. This means some books may not be good. So, I is implicit. The words 'if costly' show that most books are not costly. So, II is not implicit.

Hence, the answer is (o).
